Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML, CSS, Tailwind CSS, Framer Motion
Backend: Node.js, Express.js, PHP (Laravel, CodeIgniter), Python
API & Data: GraphQL (Apollo Client), REST APIs, JSON
Database: MongoDB, MySQL
Tools: Git, GitHub, Docker, GitHub Actions, Postman

EXPERIENCE

Web Developer

Regen Digital Inc.

- Developed and maintained production websites and web applications for clients across Australia, Norway, the Philippines, and the United States
- Built responsive web applications using React, Next.js, TypeScript, and Node.js
- Implemented new features, bug fixes, and performance improvements
- Collaborated with international clients and internal teams to deliver business solutions

Software Engineer

NGnair | US-based Fintech

- Contributed to production fintech systems including Marketplace, POS, Customer, and Product modules
- Built and maintained React/Next.js apps integrated with GraphQL APIs
- Implemented authentication flows (token handling, refresh logic)
- Standardized UI components and improved overall UX
- Handled iframe embedding and basic CSP configurations

Full Stack Developer

Rekomento – MSME Recommender System | Byte Forward Hackathon 2025 Champion

- Built a full-stack AI platform that recommends government programs, funding opportunities, and business support tools for MSMEs
- Developed frontend, backend, database, and AI-powered recommendation features
- Integrated image analysis for business classification from uploaded photos

EDUCATION

Bachelor of Science in Information Systems

Our Lady of Fatima University | 2019–2023
